Envision CMS Time

Time to Portal

Time To Accounting

Remote time entered

Time approved

Transferred to accounting
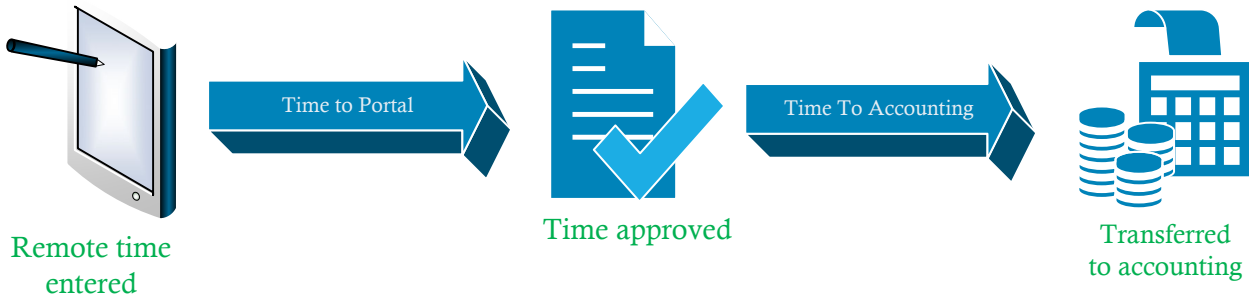

Applications for remote time entry for connected or disconnected smart devices including IOS and Android phones and tablets.

Applications allow time entry for jobs, projects, equipment usage, equipment maintenance, work orders and general time.

Applications allow crew-based supervisor entry or self-entered time.

Application users can choose entered time or clock-in/clock-out time.

Kiosk mode allows supervisor to log in and other staff to enter time or clock-in/clock-out using PIN numbers

Application syncs with Envision Time Portal where time can be reviewed and edited.

Portal has flexible reporting and approval system.

Portal allows two-way interface to Accounting systems including connectors for Quickbooks, Sage 100 Contractor and Viewpoint Spectrum.

Standalone option also available.
